

Scenario:

You're a 16 year old teenager who is home alone while both of your parents are out of town on a business trip for the weekend. All you have at home to eat are ingredients and snacks. You want to make a meal for yourself with the recipes you have using the Automatic Recipe Generator app.

Task 1: Find different recipes using various ingredients

Task 2: Try to make an account and upload your own recipe onto the app

Task 3: Save some recipes and check them in your "Saved Recipes" tab in your account

Notes:

Changes:

- Create a "confirm ingredients" button on the ingredient selection screen to move onto the next screen
- Add a "Vegan" option for the customized
- Create a "Confirm" button on the filters screen to move onto the next screen

Keep the same:

- Ratings on recipes
- The "account" slide
- The slide that lists all available recipes
